## Artwork Requirements

### Colour Management

All colours to be in CMYK (not RGB)

### File Formats Supported

EPS (all fonts outlines)

PDF (300DPI at actual size and all fonts outlines)

JPG (300DPI at actual size)

### File Scale

For prints smaller than 4m2 scale at 1:1 at 300DPI

For prints larger than 4m2 scale at 1:10 at 300DPI

### File Size

Files are limited to 100MB in size. If your file exceeds this limit, additional charges will apply.

All files larger than 10MB in size need to be sent via file share link (YouSendIt etc) and not via email.

### Bleed

5mm Bleed required for all prints smaller than A3,

10mm Bleed required for prints larger than A3.

Certain stocks require a custom bleed and will be advised once the order has been processed.

### Colour Matching

If you would like us to match a particular colour you need to supply a pantone colour (PMS) or colour sample.

PMS colours will be matched to the closest CMYK values. Exact colour matches are not always possible as all printing processes are different. We will advise you if a particular colour can not be matched before proceeding to print. Colour matching will attract a fee.

### Colour Proofs

We can supply colour proofs for a fee.

### Fonts

All fonts must be converted to outlines

### Vinyl Cutting Files

Please supply all files in EPS at 1:1 scale. All solid objects are to have No stroke lines and files must not be masked.
